Abstract

[Write a concise abstract of 150–250 words. The abstract should clearly state the background, problem statement, objective, methodology, key findings or expected results, and significance of the study. Avoid citations, tables, figures, and undefined abbreviations in this section.]

Keywords: [Keyword 1; Keyword 2; Keyword 3; Keyword 4; Keyword 5]

1. Introduction

[Provide the background of the study, research gap or issue, and the rationale for conducting the work. The final paragraph should clearly state the objective of the study.]

2. Methodology

[Describe the research design, materials, tools, data collection, experimental setup, simulation model, survey method, analytical approach, or development process. Include enough detail for readers to understand how the study was conducted.]

3. Results and Discussion

[Present the main findings, expected results, analysis, prototype output, simulation outcomes, or preliminary observations. Discuss the meaning of the results and relate them to the study objective. Figures and tables may be included if necessary.]

4. Conclusion

[Summarize the major findings, contribution, implication, and potential future work. Avoid introducing new results in this section.]

Acknowledgement

[Optional. Acknowledge funding, institution, supervisor, collaborators, laboratory support, or any relevant contribution.]
